

NOTICE TO HIRERS

USE OF DISCO EQUIPMENT IN THE HALL.

In order to prevent damage to the floor –

All equipment must be carried into the hall.

It must not be dragged or rolled into position.

Wires must not be taped down to the floor as this lifts the varnish and the polish, but you must ensure that wires are not a trip hazard.

We have two permanently wired speakers with sockets on the wall to the left of the bay window. They accept standard jacks. This will eliminate the need for trailing wires.

No wires should cross the fire exit door and no equipment must obstruct the fire exit door in any way.

Noise levels must be kept within the legal limits and noise level checks should be made.

Damage to the floor will be charged at a standard rate of £20.
